## Objectives

Form part of the senior management of an entity, where an innovative and expansion culture is committed as a basis for growing and generating business.

In this context, I am looking for an opportunity where I assume the responsibility of contributing to the growth of the business by defining strategies, developing and executing the actions aimed at achieving the objectives and the strategic plan of the company.

Start my own business and consolidate it in the market.

## Positions of interest

The positions in which in my opinion I can contribute all the experience:

Cyber Security Analyst.

Technological Consultant.

Network Analyst.

Responsible for security environments.

Software architecture designer.

CEO of my own company.

COO

CIO of my own company or others.

CTO of my own company or others.

CDO of my own company or another.

## Professional experience

**Entrepreneur selling online business. Co-Founder CT Vegan Brand**

August 2020 – May 2021

- Development of a company dedicated to the sale of vegan products on the Internet.
- Design and creation of the ecommerce platform.
- Design of business strategies.
- Definition of the monetization areas of the project.
- Definition of the products to market.
- Community manager of the business.

**Skills and Learnings:** Entrepreneurship and product management, creativity, results orientation, product inventory logistics management and ability to manage conflicts.

### Researcher I+D Cybersecurity Group GSyA

November 2020 – May 2022

During my work as a Technologist at GSyA, I carried out projects such as Hack&Win, which consists of a totally personalized platform where users can learn cybersecurity with challenges developed by me. I also carried out large-scale projects such as user training workshops. But mainly the skills I have acquired after this period are:

- Development of a cybersecurity competition called Hack&Win.
- Development of training workshops for users.
- Development of a web platform
- Design and creation of cybersecurity challenges.
- Contribution to computer security at UCLM.
- Research.
- Carrying out security audits.

**Skills and Learnings:** Empathy, ability to resolve conflicts, teamwork, analytical skills, active listening, effective communication and results orientation.

### Cybersecurity content creator

May 2022 – Present

- Creation of a personal brand.
- Creation of an audience related to cybersecurity.
- Development of a work environment.
- Creation of different frameworks for different direct formats.

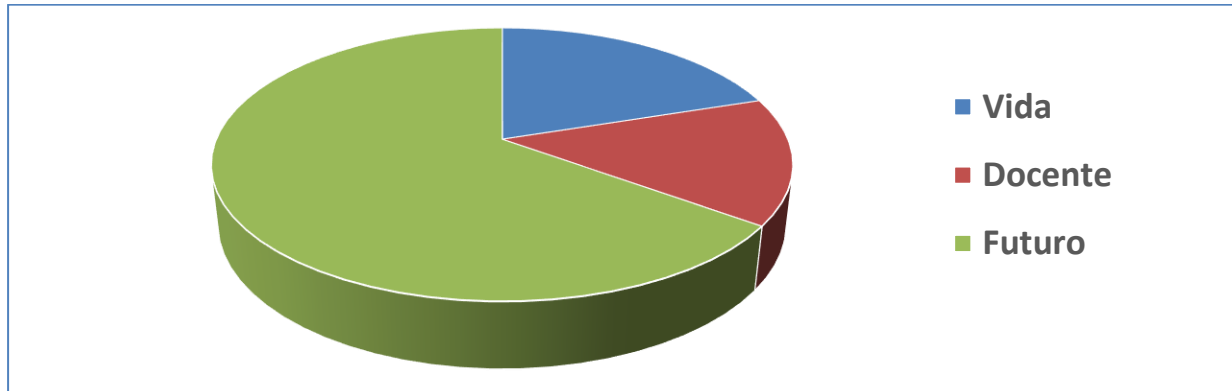

**Skills and Learnings:** Creativity, pressure tolerance, results orientation, planning and conflict resolution skills.

**Developed Projects:** During my work at the University I have carried out projects of special caliber such as the development of a cybersecurity platform to solve challenges and learn the different types of cybersecurity.

This project was approved by the University and presented as a competition at the Santa Tecla week of activities at the Ciudad Real School of Computing, where collaborators such as the College of Computer Engineers and Telefónica donated €1,000 in prizes for the winners.

During my studies at the University I have also carried out security audits, finding important security flaws that involved carrying out maintenance on the Computer Services of the University of Castilla La Mancha.

### EXPERIENCE

## Education

### **Compulsory Secondary Education**

September 2012 – June 2016 / Salesians Ciudad Real

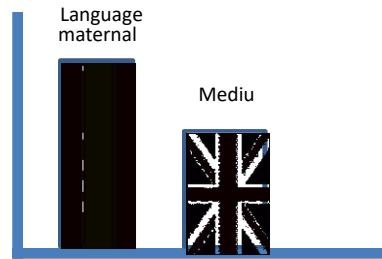

### **Baccalaureate of Technological Sciences**

September 2016 – May 2018 / Salesians Ciudad Real

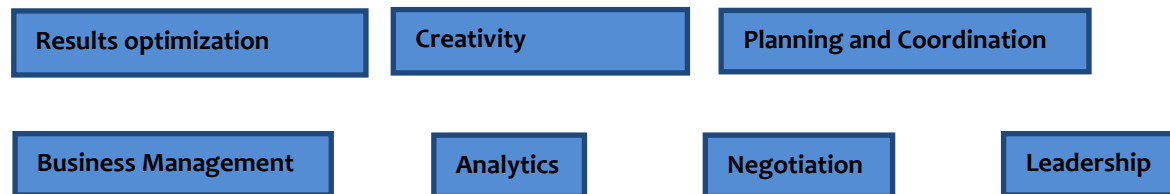

### **Degree in Computer Engineering**

September 2018 – July 2022 / Castilla La Mancha University
